

Mechanical PM's, Coordinator's, and Estimators

Mechanical Estimators, Mechanical Project Coordinators, Mechanical Project Managers

Why limit yourself to one company? Speak to a Mechanical / Electrical Business Manager and find out what companies are hiring, what they have to offer, and take a new approach to finding a company that can offer you the type of career that you have been looking for. Stop sending your resume to employers, and waiting to hear back from them for weeks on end!

My name is Nicholas Di Pede and I work as a recruiter with some of the top engineering and construction companies in Ontario. As opposed to sending your resume into companies that will never call you back, and salvage your reputation with your current employer...let me leverage my contacts with the Directors, Managers, and Vice Presidents of the companies that I am affiliated with to organize a meeting/interview for you.

Beresford Blake Thomas is an affiliate member of the Professional Engineers of Ontario, A member of the Toronto Construction Association, Member of ACCESS (the board that governs law and ethics in recruitment), and many other organizations. We take part in regular industry related meetings and councils to make sure that we are connected for you, and can assist you in finding a job in a discreet and professional manner.

If you would like to speak to myself, or one of our senior consultants please submit your resume in complete confidence to the following for review:

e-mail: ndipede@bbtglobal.ca

fax: 416-646-0631 ATTN: MECHANICAL /ELECTRICAL DEPARTMENT

phone: 416-644-1078 ex.2209

[Beresford Blake Thomas \(BBT\)](#) is a global recruitment consultancy with a wealth of staffing expertise and offices in over 30 countries around the globe, across 5 continents. Due to our growth, we're constantly on the lookout for qualified professionals and are uniquely positioned to find you the best opportunities. In our Toronto office, we specialize in identifying and recruiting high calibre technical professionals from a variety of disciplines for North American engineering and construction firms. "
